## List of tables

|   |                    |
|---|--------------------|
| <b>1. Housing, infrastructure and living area</b>   | <a href="#">15</a> |
| 1.1 Type of dwelling  | <a href="#">15</a> |
| 1.2 Characteristics of dwelling   | <a href="#">16</a> |
| 1.3 Dominant construction material of the dwelling's walls  | <a href="#">17</a> |
| 1.4 Construction material of roof   | <a href="#">18</a> |
| 1.5 Construction material of wall   | <a href="#">19</a> |
| 1.6 Type of road leading to the dwelling  | <a href="#">20</a> |
| 1.7 Car can reach entrance of house by the street   | <a href="#">21</a> |
| 1.8 Street leading to the house is equipped with lighting   | <a href="#">22</a> |
| 1.9 Number of rooms in dwelling   | <a href="#">23</a> |
| 1.10 Number of rooms in dwelling (mean)   | <a href="#">24</a> |
| 1.11 Number of rooms in dwelling used for sleeping  | <a href="#">25</a> |
| 1.12 Crowding   | <a href="#">26</a> |
| 1.13 Size of living area (square meters, mean)  | <a href="#">27</a> |
| 1.14 Size of living area per person (square meters, mean)   | <a href="#">28</a> |
| 1.15 Independent kitchen  | <a href="#">29</a> |
| 1.16 Separate bathroom with a bathtub and/or a shower   | <a href="#">30</a> |
| 1.17 Type of toilet facility  | <a href="#">31</a> |
| 1.18 Location of toilet   | <a href="#">32</a> |
| 1.19 Areas outside dwelling that household can use  | <a href="#">33</a> |
| 1.20 Means of garbage disposal  | <a href="#">34</a> |
| 1.21 Main source of water   | <a href="#">35</a> |
| 1.22 Stability of water supply  | <a href="#">36</a> |
| 1.23 Water storage tank   | <a href="#">37</a> |
| 1.24 Water storage capacity sufficient to cover household needs   | <a href="#">38</a> |
| 1.25 Main source of drinking water  | <a href="#">39</a> |
| 1.26 Secondary source of drinking water   | <a href="#">40</a> |
| 1.27 Electricity from the public network  | <a href="#">41</a> |
| 1.28 Frequency of cut-offs in the supply of electricity   | <a href="#">42</a> |
| 1.29 Tenure of dwelling   | <a href="#">43</a> |
| 1.30 The way to dwelling ownership  | <a href="#">44</a> |
| 1.31 Type of landlord   | <a href="#">45</a> |
| 1.32 Monthly market rent of dwelling (mean)   | <a href="#">46</a> |
| 1.33 New space ever added to the dwelling at the cost of the household  | <a href="#">47</a> |
| 1.34 Major renovation of the dwelling ever undertaken at the cost of the household  | <a href="#">48</a> |
| 1.35 Households that have received assistance to renovate, to upgrade or to enlarge their dwelling in the past, by source of assistance | <a href="#">49</a> |
| 1.36 Rent out room  | <a href="#">50</a> |
| 1.37 Negative aspects of indoor environment   | <a href="#">51</a> |
| 1.38 One or more of the dwelling's walls have major cracks  | <a href="#">52</a> |
| 1.39 Improvement needs of dwelling (household's own assessment)   | <a href="#">53</a> |
| 1.40 Dwelling exposed to noise  | <a href="#">54</a> |
| 1.41 Degree of satisfaction with space/ size of dwelling  | <a href="#">55</a> |
| 1.42 Degree of satisfaction with privacy in dwelling  | <a href="#">56</a> |
| 1.43 Degree of satisfaction with housing cost of dwelling   | <a href="#">57</a> |

|   |           |
|---|-----------|
| 1.44 Degree of satisfaction with exposure to noise in dwelling                    | <u>58</u> |
| 1.45 Degree of satisfaction with indoor environment of dwelling                   | <u>59</u> |
| 1.46 Degree of satisfaction with pollution and outdoor cleanliness of living area | <u>60</u> |

| 3.15 Residence of close relatives living outside Jordan                                  | <a href="#">127</a> |
| <b>4. Education and educational services</b>   | <a href="#">128</a> |
| 4.1 Current enrolment in school. Individuals aged 6-25                                   | <a href="#">128</a> |
| 4.2 Current enrolment in school. Individuals aged 6-25. By gender and age                | <a href="#">129</a> |
| 4.3 Enrolment in kindergarten. Children aged 4-6   | <a href="#">130</a> |
| 4.4 Current enrollment by level  | <a href="#">131</a> |
| 4.5 Contribution to educational expenses the previous school year (2010-2011)            | <a href="#">132</a> |
| 4.6 Type of basic schools attended by camp children                                      | <a href="#">133</a> |
| 4.7 Location of basic schools attended by camp children                                  | <a href="#">134</a> |
| 4.8 Extra lessons in same subjects as regular education                                  | <a href="#">135</a> |
| 4.9 Short-term vocational training past 12 months  | <a href="#">136</a> |
| 4.10 Highest education completed   | <a href="#">137</a> |
| 4.11 Type of basic school mostly attended by those not currently enrolled                | <a href="#">138</a> |
| 4.12 Country of highest educational attainment   | <a href="#">139</a> |
| 4.13 Ever attended short vocational training. By authority or place of training course   | <a href="#">140</a> |
| 4.14 Reason for not attending school   | <a href="#">141</a> |
| 4.15 Literacy  | <a href="#">142</a> |
| 4.16 Literacy by gender and age  | <a href="#">143</a> |
| 4.17 Type of basic school the child is attending   | <a href="#">144</a> |
| 4.18 Parents' assessment of the quality of the basic school their children are attending | <a href="#">145</a> |
| 4.19 Most important issue to be improved in the basic school where child is enrolled     | <a href="#">146</a> |
| 4.20 Most preferred service provider for child's basic education if parent could choose  | <a href="#">147</a> |
| 4.21 Child ever subject to corporal punishment at school                                 | <a href="#">148</a> |
| 4.22 Child ever subject to verbal abuse at school  | <a href="#">149</a> |
| 4.23 Type of basic school the person (mostly) attended                                   | <a href="#">150</a> |
| 4.24 Perception of the quality of the basic school (mostly) attended                     | <a href="#">151</a> |

|   |                     |
|---|---------------------|
| 4.25 Would have liked to transfer to basic school run by different type of basic school | <a href="#">152</a> |
| 4.26 Preferred type of basic school   | <a href="#">153</a> |
| 4.27 Number of students in class at basic school (last year attended)                   | <a href="#">154</a> |
| 4.28 Satisfaction with basic school: physical standard of school buildings              | <a href="#">155</a> |
| 4.29 Satisfaction with basic school: educational equipment and learning facilities      | <a href="#">156</a> |
| 4.30 Satisfaction with basic school: textbooks and curriculum                           | <a href="#">157</a> |
| 4.31 Satisfaction with basic school: teachers' knowledge and skills                     | <a href="#">158</a> |
| 4.32 Satisfaction with basic school: teachers' treatment of children                    | <a href="#">159</a> |
| 4.33 Most important issue to be improved in basic school                                | <a href="#">160</a> |
| 4.34 Felt safe at basic school  | <a href="#">161</a> |
| 4.35 Felt safe walking/ travelling between home and basic school                        | <a href="#">162</a> |
| 4.36 Average time spent on homework daily, in (last year of) basic                      | <a href="#">163</a> |
| 4.37 Absence from basic school due to domestic duties or other work                     | <a href="#">164</a> |
| 4.38 Ever subject to corporal punishment at basic school                                | <a href="#">165</a> |
| 4.39 Occurrence of corporal punishment at basic school                                  | <a href="#">166</a> |
| 4.40 Ever subject to verbal abuse from teacher or other staff at basic school           | <a href="#">167</a> |
| 4.41 Occurrence of verbal abuse by teacher or other staff at basic school               | <a href="#">168</a> |
| 4.42 Ever learned about sexual abuse of fellow students at basic school                 | <a href="#">169</a> |

|   |                     |

# Introduction

## Study and data

This tabulation report comprises descriptive statistics from a study of the living conditions of the Palestinian refugee population residing inside Jordan's 13 Palestinian refugee camps.<sup>1</sup> The study was initiated by Jordan's Department of Palestinian Affairs, funded by the Government of Norway, and implemented by Fafo in close collaboration with Jordan's Department of Statistics, and with design input from UNRWA.

The study collected data through two large-scale surveys: (i) a comprehensive survey of the 13 Palestinian refugee camps (April to June 2011); and (ii) a multi-topic survey of a representative sample of Palestinian refugee-camp households (September to November 2011). This report consists of tables with data from the sample survey.

The study did not cover the natural extension of camps, but was limited to the 'official' or 'historical' borders of the camps since they have traditionally defined the mandate areas of the DPA. In principle, therefore, the results of the comprehensive survey are not valid for Palestinian refugees residing in the camps' extensions. However, according to DPA and UNRWA, the circumstances of people residing in these adjacent areas are not significantly different from those inside the historical borders. We therefore believe the findings are fairly representative for the living conditions of Palestinian refugees residing in these adjacent areas also.

The sample survey comprised two questionnaires: (i) a household questionnaire which collected data about dwelling standards and people's residential area, the household as an entity (income, savings and debt, durable goods), and information pertaining to each household member (gender, age, civil status, refugee status and nationality, chronic illness and use of health services, educational attainment and current enrolment, employment and unemployment, income), and (ii) a Randomly Selected Individual (RSI) questionnaire posing questions about attitudes and perceptions (e.g. satisfaction with health and education services, labour force participation, feeling of safety in the neighbourhood) to one randomly selected person aged 15 and above in each household.

The sample survey fieldwork was implemented from 23 October to 21 November 2011. The sample was a linear systematic random sample of all households which were listed and interviewed during the comprehensive survey.<sup>2</sup> Hitteen camp was oversampled with a take of 900 households to allow independent reporting on that camp, while the remaining 3,100 households were allocated on the other 12 camps with the same inclusion probability. One household member in each selected household was

---

<sup>1</sup> Ten of the 13 camps were originally established in response to the crises in 1948 and 1967 on government-owned or leased land for the specific purpose of establishing Palestinian refugee camps and are as such recognized as 'official' camps by UNRWA. The remaining three camps (Prince Hassan, Sukhneh and Madaba) were originally gatherings or concentrations of Palestinian refugees that were later recognized by the Jordanian government as camps but are still considered to be 'unofficial' by UNRWA. However, this has little impact on the services provided by UNRWA in these three camps.

<sup>2</sup> The comprehensive survey listed all building structures, dwellings and households inside the camps. The sample was drawn from the total list of households, excluding non-response, which varied from one to three per cent across camps.

randomly selected from all household members aged 15 and above to answer the RSI questionnaire.

Fieldwork resulted in 3,773 household questionnaires, or just above 94 per cent of the 4,000 households sampled, being successfully completed (see table, below). Thirty-six households declined to participate in the survey. The remaining ‘non-response’ primarily consists of vacant dwellings.

Despite the over-sampling of Hitteen camp, we have chosen not to report separately on Hitteen. Instead we use the four reporting domains shown in the table. Talbiyeh, Hussein (or Jabal al-Hussein), Wihdat (also called Amman New Camp) and Prince Hassan camps, all administratively located in Amman governorate, as well as Madaba camp in Madaba governorate are grouped into the ‘Amman’ reporting domain. Baqa'a camp makes up one of the four reporting domains on its own since its population size, and as a consequence its sample size, is sufficiently large to allow so. The camps of Zarqa, Su-khneh and Hitteen (also named Marka and Schneller) are classified into the reporting domain ‘Zarqa’, the governorate in which they are administratively situated. Finally, Irbid and (Martyr) Azmi al-Mufti (or Hosun) camps in Irbid governorate along with Jarash (also called ‘Gaza camp’ due to its large proportion of so-called ‘ex-Gazans’) and Souf camps in Jarash governorate are grouped into the ‘North’ reporting domain.

**Table 1 Sample and interview status. Number of households.**

|                       | Reporting domain |       |       |       | Total |
|-----------------------|------------------|-------|-------|-------|-------|
|                       | Amman            | Baq'a | Zarqa | North |       |
| Filled questionnaires | 855              | 1,026 | 1,007 | 885   | 3,773 |
| Non-response *)       | 50               | 56    | 51    | 70    | 227   |
| Sample size           | 905              | 1,082 | 1,058 | 955   | 4,000 |

\*) About 16 per cent of the non-response was refusals.

### **Palestinian refugee defined**

This report applies ‘Palestinian refugee’ in accordance with a Jordanian classification system, which was used for the first time in Jordan’s 1994 Population Census and has later been applied in several surveys by DoS and Fafo. The survey requested that all household members be categorized into the following groups:

1. Refugee from 1948;
2. Displaced from 1967;
3. Refugee from 1948, then displaced in 1967;
4. From the Gaza Strip; and
5. Non-refugee.

A ‘refugee from 1948’ is an individual whose place of permanent residence used to be in what is today the State of Israel (‘1948 areas’) and who took refuge in neighbouring countries as a result of the 1948 Arab-Israeli war and was prevented from returning. Someone ‘displaced from 1967’ is an individual who arrived in (the east bank of the riv-

er) Jordan in conjunction with the 1967 war, and who was not already a refugee from 1948. ‘Refugees, then displaced’ are people who were first forced to flee due to the 1948 war and settled in the West Bank (from 1951 part of Jordan) and then had to flee for the second time in conjunction with the 1967 war. The label ‘from Gaza Strip’ refers to people who arrived in Jordan from Gaza, mostly as a result of the 1967 war, and were unable to return, some of whom had already been displaced once in 1948. Descendants of these four categories of refugees and displaced inherit the status through the patrilineal line. The fifth group in this classification system is a residual category, comprising all those who did not fit into the first four categories. It includes individuals from various backgrounds, including Egyptians, Syrians and other foreign nationals as well as a few Jordanians of Palestinian origin who do not consider themselves refugees (as defined here).

A ‘Palestinian refugee’, or simply ‘refugee’, in this report refers to a person who belongs to any of the first four categories.<sup>3</sup> Hence, when we report on individual characteristics, we only use data on refugees according to the Jordanian classification system. However, we also report on Palestinian refugee *households*, defined as any household with at least one member who is a Palestinian refugee as defined above. Two and one-half per cent of all refugee-camp households completely lack members who are Palestinian refugees. Hence, 97.5 per cent of all households are refugee households, as defined by us.

### **Reading the tables**

The tables contain the values of the output variable (the issue we are interested in) in the columns. The values or results for the entire sample population are given in the top-most row. The background variable or individual/household characteristics are displayed in the rows. This allows for comparison of various sub-groups, e.g. across place of residence, age or educational attainment.

The results are displayed as percentages, but contain the number of observations (the un-weighted ‘N’) as row totals.

In some tables, one or more cells contain a dash instead of a number. This implies that not a single person or household had that particular value on the output variable. Rounding up to the nearest decimal is used. Hence, if one or very few persons or households have a value but they add up to less than 0.05 per cent, it would be presented as zero in the table.

In some tables, crucial information about the respondents or N is placed under the table itself.

---

<sup>3</sup> This is different from the definition of ‘Palestine refugee’ applied by UNRWA, whose core mandate is to provide services to ‘Palestine refugees’, defined as any person whose ‘normal place of residence was in Mandate Palestine during the period from 1 June 1946 to 15 May 1948 and who lost both home and means of livelihood as a result of the 1948 Arab-Israeli war’.
